**R03-07-008 - Order Instituting Rulemaking adopting rules to account for the consideration received by regulated California electric and natural gas utilities under a settlement with El Paso Natural Gas Company, et al.**

This order adopts accounting and ratemaking treatment of the portion of the El Paso Settlement that will be paid to entities, utilities and ratepayers subject to the jurisdiction of the Commission. Respondent utilities shall file advice letters within 30 days of the date this order is mailed to amend their tariffs as necessary to propose refund plans and implement the accounting and ratemaking treatment ordered herein. The petition to intervene filed by the County of San Bernardino is granted. This proceeding is closed.

### 37 **R01-09-001 - Commission's own motion to assess and revise the new regulatory framework for Pacific Bell and Verizon California Incorporated.**

[1866]

I01-09-002 - Related matters. In this decision, the Commission evaluates the service quality of Pacific Bell and Verizon California, Inc. over the period January 1, 1990 through the present. The Commission ordered such a review in D89-10-031, which established the New Regulatory Framework as means of regulating both carriers.

### 37a **ALTERNATE TO ITEM 1866**

[2366]

This alternate finds that under the New Regulatory Framework (NRF), Verizon has provided excellent customer service. Pacific Bell has provided generally good service, but several of its operations suffer from poor service quality. The alternate reaches these conclusions through a statistical examination of the direct measures of service quality provided by Pacific Bell and Verizon to this Commission and to the FCC. The alternate further finds that Verizon and Pacific Bell developed different service quality records during the NRF period, but that both show an improving trend in service quality. This evidence casts doubt on the proposition that NRF systematically decreases the quality of customer service.

**37b                   ALTERNATE TO ITEM 1866**

[2677]

This alternate finds that, under the New Regulatory Framework (NRF), Verizon provided generally improving service that compared favorably with other large carriers on most measures, with just a few areas of weakness. Pacific Bell's service was stable for the majority of measures we studied and compared favorably to other large carriers on many measures, but Pacific's service exhibited several important areas of weakness, especially for residential customers. The alternate finds that there is insufficient evidence to establish whether NRF caused either positive or negative changes in service quality.

**41a                    ALTERNATE TO ITEM 2823**

[2826]                    I95-04-044 - Related matters. This decision concludes that adequate telephone numbers still exist in the 909 area code to provide customers and telephone carriers with sufficient service. It is not necessary at this time to split or overlay the 909 area code. Instead, the Commission should closely monitor the additional need for telephone numbers in the 909 area code to assure adequate telephone number supplies, implement its authority to increase the contamination rate in the 909 area code, and further advocate other number conservation proposals with the Federal Communications Commission.
